

# Bronco

***We do it like no other***

A Therapeutic Laser and Much More! The Scalar Wave Laser (SWL) is an indispensable device for home and pro medical use for effective PAIN RELIEF, healing, injury recovery, and anti-aging. The SWL cold laser or low level laser combines 5 different healing energy technologies into one light and portable hand-held device. This is a Quantum Therapeutic Laser - healing device that surpasses all others.

Bronco by Collaserscope LLC is the new approach to LLLT. The Bronco influences on human's bioactive zones with low intensity electromagnetic radiation and stimulates organism's own vital resources, improves circulation of blood and intensifies the immune system. The main treatment areas for the Bronco are Rheumatoid arthritis are to control inflammation and help with pain associated with the Reumatoid. The Bronco falls under the category of alternative and complementary therapy for Rheumatoid arthritis. The Bronco is offering a better and faster way to relief pain and gain joint mobility. Treatment duration is between 1- 5 minutes with an average of 5 treatments over a five day period.

Cutting edge technology in soft laser therapy: soft laser power - in a light, portable, rechargeable and user friendly device, for the rapid, noninvasive and efficient treatment of Arthritis pain, sports injuries, inflammation. It is a portable soft laser device with the healing power equal to that of a full-sized, stationary, expensive soft-laser.

The use of low levels of visible or near-infrared (NIR) light for reducing pain, inflammation and edema, promoting healing of deeper tissues and nerves, and preventing tissue damage has been known for almost forty years since the invention of lasers.

Cold Laser Therapy is a colloquial term for photobiomodulation or Low Level Laser Therapy (LLLT).

Cold Laser has been used for many years on sports injuries, arthritic joints, neuropathic pain syndromes, back and neck pain. Over 300 randomized clinical trials have been published on Cold Laser, half of which are on pain.

## Benefit of Cold Bronco Lasers:

- Easy to apply.
- Extremely safe.
- Non-Toxic.
- Non-Invasive.
- No side effects or pain.
- Cost effective for both the practitioner and patient.
- Highly effective in treating ailments (more than 90% efficacy).
- Superior alternative to analgesics, NSAID's and other medications.
- Reduces the need for surgery.

Laser Therapy reduces both the short term inflammation and long term risk of arthritis commonly associated with sports injuries.

Infusion Technology which imprints a full spectrum, of vibration frequencies into the bands.

The Collascope System is a revolutionary, it falls under the LLLT device family however, and utilizing enhanced infused platforms makes the difference between the Bronco Collascope and the rest.

The Bronco is helping patients who suffer from arthritis to achieve a reduction in the level of pain gain movement and mobility to the damaged area without the use of pharmaceutical.

Based on long-term years of researches the most effective forms of therapeutic action were selected for using in the Collascope device.

Biological tissues are optically transparent in this wavelength range.

Super pulsed IR laser radiation deeply penetrates into tissues and exerts a powerful stimulating effect on blood circulation, cell membrane metabolism, activates neuro-humoral factors, immuno-competent systems, regulates the hormonal system.

## Collascope competition:

- Pharmaceutical opiates- Prescription Analgesic (pain killers) is an epidemic in the USA it extends Beyond statistics.
- Non-steroidal anti-inflammatory drugs (NSAIDs) Topical Painkillers for Arthritis.
- Steroids Anti-Inflammatory Drugs Corticosteroid Injections for Osteoarthritis.
- Disease-modifying anti-rheumatic drugs (DMARDs) Treating Osteoarthritis with Knee Injections.
- Biologic therapies, or biologics Acupuncture for Osteoarthritis.
- Surgery for Rheumatoid Arthritis Narcotic Pain Relievers for Osteoarthritis Knee and hip Replacement for Osteoarthritis.
- Joint replacement - Tendon reconstruction - Synovectomy Joint Fusion Surgery.
- Alternative and Complementary Therapy for Rheumatoid Arthritis Osteoarthritis and Occupational Therapy.
- TCM - Traditional Acupuncture.

The problem with chemical therapy is its non-specific, generalized nature, which results in numerous side effects.

Drawbacks to repeated and continuous drug ingestion or infusion include toxicity and chemical dependence.

## Biological effects:

- Increase of enzymatic activation
- Improvement of the blood circulation
- Anti-inflammation action
- Anti-edematous action
- Analgesic effect etc.

Cold laser therapy is yet another method in the set of tools to help assist in pain relief, and it is considered a reasonable treatment option for certain types of pain by most health care professionals.
